PROFESSIONAL SUMMARY

Computer Science student and Software Engineer with 3+ years of hands-on experience building backend systems, distributed microservices, and mobile applications. Experienced in Kotlin, Java, and Go, with a focus on cloud-native architectures, real-time communication, and scalable backend development. Familiar with Kubernetes, Docker, messaging systems, and modern Android development. Seeking a working student position in backend or software engineering.

SKILLS & CORE COMPETENCIES

Programming Languages	Kotlin · Java · Go · C · C++ · Python · SQL
Backend Development	Spring Boot · Microservices · REST APIs · WebSockets · SSE
Mobile Development	Android SDK · Jetpack Compose · Compose Multiplatform · Kotlin Multiplatform · MVVM
Databases & Messaging	MongoDB · PostgreSQL · Redis · RabbitMQ · Kafka
Cloud & DevOps	Docker · Kubernetes · GCP · Cloud Run · CI/CD · GitHub Actions · Jenkins
Architecture	Distributed Systems · System Design · Microservices

PROFESSIONAL EXPERIENCE

Software Development Trainee (Vocational Training) — Easy Software

Sep 2023 – Jan 2025 | Essen, Germany

- Developed and maintained cloud-native backend microservices using **Java (Spring Boot)** and **Go**, supporting scalable enterprise document workflows.
- Worked with containerized microservices deployed on **Kubernetes**, implementing service communication and supporting distributed application environments.
- Automated build, testing, and deployment pipelines via **CI/CD** and managed containerized staging environments on **Kubernetes**, reducing manual deployment overhead.
- Collaborated within cross-functional **Agile (Scrum)** engineering teams to participate in system design, code reviews, and iterative sprint deliveries.

PROJECTS

Commu — Real-Time Messaging & Calling Platform

Go • Kotlin • Jetpack Compose • WebRTC • WebSockets • RabbitMQ • Redis

- Architected a scalable real-time messaging and VoIP mobile application utilizing **Go** backend microservices and **Jetpack Compose** on Android.
- Implemented bi-directional **WebSocket** communication and a peer-to-peer **WebRTC** signaling and media engine for low-latency audio/video calls.
- Integrated **RabbitMQ** for asynchronous message queuing, **Redis** for presence/caching, and **FCM** for reliable push notifications.

Microservices and Kubernetes Project

Java • Go • Kubernetes • Microservices • Docker

- Developed a cloud-native microservices application leveraging **Kubernetes** for orchestration, scalability, and service discovery. Built services using **Java** and **Go**, ensuring seamless communication and integration for a robust and distributed system.

Tidoco — Cross-Platform Appointment Booking Platform

Kotlin • Compose Multiplatform • Spring Boot • MongoDB • SSE • GCP

- Developing a cross-platform appointment booking platform for service-based businesses, including barbershops, salons, and nail studios.
- Building backend services with **Java** and **Spring Boot**, implementing appointment management, business operations, and RESTful APIs backed by **MongoDB**.
- Implementing real-time appointment updates using **Server-Sent Events (SSE)**, enabling business dashboards to receive booking notifications without polling.
- Developing a shared cross-platform mobile application architecture using **Kotlin Multiplatform** and **Compose Multiplatform**.

EDUCATION

Bachelor of Science, Computer Science Oct 2025 – Oct 2028 (Expected)
Holon Institute of Technology (HIT) — Holon, Israel

LANGUAGES

Arabic Native	**English** Fluent
German Advanced	**Hebrew** Intermediate
